Launcher window literally does not fit inside the screen, making the "start" button impossible to press. Amateur hour developers.. Contents of the game: 5 Mb game engine 500 mb epic communist music Possibility of MAGA (Make Albania Great Again) But seriously, demolish the bunkers first.. I'm sorry, but this game is incomprehensible garbage. The "instructions" are unhelpful, and the messaging to the player throughout is unsatisfactory (e.g. if you have a budget deficit it won't allow you to press "play" on time passing but also doesn't warn you about this, simply changing your screen to the economy screen with no warning or explanation whatsoever). Then almost no matter what you do in the opening turns, the game ends with failure. This is not fun, intelligent, or interesting. And I say that as a political sciences student and avid fan of political strategy games. Avoid this game like the plague. It's literally the worst game I've played on Steam.
