My 5 year old says "I don't like it because the car is controlling itself, but I do like the game. I want thumbs across.". Really bad physics.. Played it for about an hour and then it started spawning two cars piled on top of one another as a glitchy undriveable mess AND the camera stopped tracking with the car. uninstalled and reinstalled. didn't fix it.. Great little game! Can't wait for the full release.. Played it for about an hour and then it started spawning two cars piled on top of one another as a glitchy undriveable mess AND the camera stopped tracking with the car. uninstalled and reinstalled. didn't fix it.. Garbage. No clear instructions, overly sensitive controls and you can't even mount the pavement.. Simple nice voxel car racing game great for a casual gameplay - extremely cheap - customize your car and race against the clock or against your friends. Can I recommend this game? No, not at all. The customization is absolutely minimal, only a few select parts, only a handful of colours, and the same goddamn route all over again, with unreliable traffic that just straight-up stops you dead in your tracks. It'd be better if it actually had something happen with the collision, actually had racing (since racing against the same u2665u2665u2665u2665u2665u2665 time, over and over again, is just very stupid), and actually had more maps and more customization. Rating? 3/10. It's lightly amusing but that's as far as it actually gets.. Garbage. No clear instructions, overly sensitive controls and you can't even mount the pavement.. Very bad game with bad acceleration and unexpected high graphic requirements.Also the music was just terrible.
